MAGIC 2010: 14 robots, one operator.
Interaction time never published; their
own unsaturated operator bounds it
below 15 s.
SandTable
n* = 6.4
(b) and what the link does to that
assets the consoles can carry
communications degradation
1 console
2 consoles
3 consoles
one-way latency exceeds
ℓ* = 6.7 s, so no request
can be answered at all.
Buying consoles does nothing.
